[The Top Five Engineering Hints You'll Important To Successful Product Engineering](#)

CONTRIBUTORS

Marco Arrigoni is a director of strategic marketing at Coherent Inc., covering the scientific research markets. **Page 41.**

Ji-Xin Cheng is a professor at the Weldon School of Biomedical Engineering, Purdue University, and at the Photonics Center, Boston University. **Page 31.**

Regular contributing editor **Marie Freebody** is a freelance science and technology journalist with a master's degree in physics with a concentration in nuclear astrophysics from the University of Surrey, England. **Page 36.**

Iñaki Gutiérrez-Ibarluzea is the vice chair of EuroScan, an international network for the identification and evaluation of new and emerging health technologies, and knowledge manager of Osteba. **Page 7.**

Chien-Sheng Liao is a research assistant at the Weldon School of Biomedical Engineering, Purdue University. **Page 31.**

Darryl McCoy is a director of product marketing at Coherent Inc., managing the ultrafast tunable and fiber laser products for nonlinear microscopy and instrumentation markets. **Page 41.**

Associate Managing Editor **Marcia Stameil** has worked for general interest newspapers, the business press and national magazines as a writer and editor. **Page 26.**

In the May/June issue of **BioPhotonics ...**

- **Medical lasers**
- **Fluorescent-guided surgical systems**
- **Fluorescence lifetime imaging**
- **Superresolution microscopy**

You'll also find all the news that affects your industry, from market reports to the latest products and media.

Technology Business Champions' Guide to Successful Commercialization

Thurs., April 13, at 1 p.m. EDT

This webinar, presented by David Krohn, managing partner of Light Wave Venture LLC, is for anyone seeking potential opportunities for marketing and selling a new technology, whether it is a product, a service or a groundbreaking idea. You will learn how to focus R&D with an eye toward commercialization, how to source funding, and more. Please note: There is a registration fee for this webinar.

To register, visit www.photonics.com/W122.

Large-Scale, Deep-Tissue Neuronal Imaging

Thurs., April 20, at 1 p.m. EDT

Sponsored by Semrock

Lingjie Kong, Ph.D., will speak on advances in large-scale deep tissue imaging of biological dynamics, focusing on applications in neuroscience. Kong received his Ph.D. in optical engineering from Tsinghua University in 2012. For postdoctoral training, he worked at Harvard University, at Howard Hughes Medical Institute's Janelia Research Campus and at Purdue University. He is planning to join the faculty at Tsinghua University.

To register, visit www.photonics.com/W104.

Introducing the CAOS Smart Camera — Empowering Extreme Imaging

Wed., April 26, at 1 p.m. EDT

In this webinar, Nabeel A. Riza, Ph.D., chair professor of Electrical and Electronic Engineering at University College Cork, will discuss the development of the Coded Access Optical Sensor (CAOS) and how, working in unison with CMOS sensors, it can extract smarter image information, including better spatial and spectral selectivity, faster speed, higher targeted pixel dynamic range and more diverse spectral bands.

To register, visit www.photonics.com/W109.
